

- **Which product category generates the most profit?**

Answer: Bikes generate the highest profit, with a total of 20.4M.

- **Which age group is the most profitable?**

Answer: Adults (35-64) are the most profitable age group, contributing 16.2M.

- **How does gender influence revenue?**

Answer: The male gender contributes 43.1 million in revenue, while the female gender contributes 41.7 million. Although there is a slight difference, both genders show almost equal purchasing behavior.

Provide 2-3 actionable recommendations for improving business performance based on your insights.

Focus on Bikes and Accessories: Since 'Bikes' and 'Accessories' are the most profitable product categories, the business should focus on promoting and expanding these categories. This may involve offering a wider variety of bikes and accessories, providing discounts, or running targeted marketing campaigns.

Target Adults (35-64): The 'Adults (35-64)' age group generates the most profit. The business should tailor its marketing efforts to reach this age group. This may involve advertising in channels frequented by this age group or offering products that appeal to their interests.

Maintain Gender Balance: As both genders contribute almost equally to revenue, the business should maintain a balance in its product offerings and marketing campaigns to appeal to both genders. This may involve offering products designed for both men and women and ensuring that marketing campaigns feature both genders.
